

Forming Factories

DESCRIPTION

- Manufacturing type of components metal sheet and forming aluminum, titanium and cress components.
- Doing all kinds of welding aerial components and manufacturing fixtures.
- Manufacturing and forming types of extrusion and seamless tubes.
- Manufacturing many types of landing gear. (skid & cross)

Machining Components Manufacturing Factory

DESCRIPTION

- Conducting Precision machinery operation with types of NC, CNC
- Precision cutting operation
- CAD/CAM
- Manufacturing and forming required shop mold.
- Manufacturing precision components for fixtures

Electro Avionics & Wiring Manufacturing

DESCRIPTION

- Providing technical document for manufacturing types of electro avionic components, electric systems, electric panel and electric cables with related documents.
- Manufacturing required electric cables.
- Manufacturing and assembling helicopter wiring tree (a unique product). Which is not sold and manufactured by effort of our engineers.
- Manufacturing many kinds of types of electric components and control boxes.
- Wiring types of light and heavy helicopters.
